CRİŞTĂCER

Sobre nosotros

About us/ À propos de nous

Hablamos claro, fabricamos bien, respondemos rápido.
We speak clearly, we build reliably, and we respond fast.
Nous parlons clairement, nous fabriquons sérieusement, nous répondons vite.

ES/

Cristacer es una marca que combina diseño funcional contemporáneo, fiabilidad industrial y esa alma familiar mediterránea que la define. Fabricamos colecciones comerciales y de tendencia, con criterio, cuidando los detalles, cumpliendo plazos y garantizando calidad. Somos un equipo accesible, humano y con experiencia. Escuchamos, respondemos y cumplimos. Queremos ser ese partner en el que puedas confiar, porque entendemos los retos del mercado y sabemos acompañarte en cada proyecto.

EN/

Cristacer is a brand that combines contemporary functional design, industrial reliability, and the Mediterranean family spirit that defines it. We manufacture commercial and trend-driven collections with clear criteria, taking care of the details, meeting deadlines, and guaranteeing quality. We are an approachable, human, experienced team. We listen, we respond, and we deliver. We want to be the partner you can trust, because we understand market challenges and know how to support you in every project.

FR/

Cristacer est une marque qui allie un design fonctionnel contemporain, une fiabilité industrielle et cette âme familiale méditerranéenne qui la définit. Nous fabriquons des collections commerciales et tendance avec exigence, en soignant les détails, en respectant les délais et en garantissant la qualité. Nous sommes une équipe accessible, humaine et expérimentée. Nous écoutons, nous répondons et nous tenons nos engagements. Nous voulons être ce partenaire en qui vous pouvez avoir confiance, parce que nous comprenons les défis du marché et savons vous accompagner dans chaque projet.

Textures you can feel, designs that inspire.
Des textures qui se ressentent, des designs qui inspirent.

ES/

Cerámica en otra dimensión

Gracias a un **innovador desarrollo cerámico**, Rising ofrece **estructura, textura y volumen** directamente sobre la superficie cerámica, creando piezas con un **realismo excepcional**, tanto a nivel visual como táctil.

El resultado son **superficies únicas**, que transmiten **naturalidad, sofisticación y calidad**, ideales para proyectos que buscan destacar por su estética y sensaciones.

Con **Rising**, la cerámica deja de ser plana para convertirse en una experiencia tridimensional, abriendo nuevas posibilidades creativas para arquitectos, diseñadores e interioristas.

Textura, estructura y volumen en cada pieza.

Realismo y naturalidad. Experiencia visual y sensorial

Tecnología innovadora que combina materias primas de última generación con aplicaciones digitales avanzadas

EN/

Ceramics in another dimension

Thanks to an **innovative ceramic development**, Rising delivers **structure, texture, and volume** directly on the ceramic surface, creating pieces with **exceptional realism** – both visually and to the touch.

The result is **unique surfaces** that convey **naturalness, sophistication, and quality** – ideal for projects seeking to stand out through aesthetics and sensory appeal.

With **Rising**, ceramics stop being flat and become a three-dimensional experience, opening new creative possibilities for architects, designers, and interior designers.

Texture, structure, and volume in every piece.

Realism and naturalness. A visual and sensory experience.

Innovative technology that combines next-generation raw materials with advanced digital applications.

FR/

La céramique dans une autre dimension

Grâce à un **développement céramique innovant**, Rising apporte **structure, texture et volume** directement sur la surface céramique, créant des pièces au **réalisme exceptionnel**, tant sur le plan visuel que tactile.

Le résultat: des **surfaces uniques**, qui expriment **naturalité, sophistication et qualité**, idéales pour les projets souhaitant se distinguer par leur esthétique et leurs sensations.

Avec **Rising**, la céramique cesse d'être plane pour devenir une expérience tridimensionnelle, ouvrant de nouvelles possibilités créatives aux architectes, designers et architectes d'intérieur.

Texture, structure et volume sur chaque pièce.

Réalisme et naturalité. Une expérience visuelle et sensorielle.

Technologie innovante associant des matières premières de dernière génération à des applications numériques avancées.

Tech surface

Diseño, durabilidad y confianza en cada proyecto.
Design, durability, and confidence in every project.
Design, durabilité et confiance pour chaque projet.

ES/

La nueva generación de porcelánicos de alto rendimiento

Tech Surface es un porcelánico de **altas prestaciones técnicas**, diseñado para ofrecer **resistencia, seguridad y facilidad de mantenimiento**.

Gracias a un **avanzado proceso de investigación y desarrollo**, que combina materiales de última tecnología y técnicas de fabricación de vanguardia, hemos logrado un porcelánico con **propiedades superiores**, que se adaptan a las exigencias del diseño arquitectónico y la construcción moderna, desde proyectos residenciales hasta espacios comerciales de alto tránsito

Por qué elegir Tech Surface

- **Seguridad garantizada:** alta resistencia antideslizante perfecta para zonas húmedas y áreas de alto tráfico.
- **Alta resistencia a las manchas,** manteniendo su aspecto como el primer día. Fácil de limpiar, asegurando una higiene óptima y bajo mantenimiento
- **Máxima durabilidad:** dureza al rayado y alta resistencia a la abrasión para un uso intensivo sin desgaste.

EN/

The new generation of high-performance porcelain stoneware

Tech Surface is a porcelain stoneware product with **high technical performance**, designed to deliver **strength, safety, and easy maintenance**.

Thanks to an **advanced research and development process** – combining state-of-the-art materials with cutting-edge manufacturing techniques – we have achieved a porcelain stoneware with **superior properties**. It meets the demands of contemporary architecture and modern construction, from residential projects to high-traffic commercial spaces.

Why choose Tech Surface

- **Guaranteed safety:** high slip resistance, ideal for wet areas and high-traffic zones.
- **High stain resistance:** maintains its appearance like the first day. Easy to clean, ensuring optimal hygiene and low maintenance.
- **Maximum durability:** high scratch resistance and excellent abrasion resistance for intensive use without wear.

FR/

La nouvelle génération de grès cérame haute performance

Tech Surface est un grès cérame aux **très hautes performances techniques**, conçu pour offrir **résistance, sécurité et facilité d'entretien**.

Grâce à un processus **avancé de recherche et développement**, associant des matériaux de dernière génération à des techniques de fabrication de pointe, nous avons obtenu un grès cérame aux **propriétés supérieures**, adapté aux exigences de l'architecture et de la construction modernes, des projets résidentiels aux espaces commerciaux à fort passage.

Pourquoi choisir Tech Surface

- **Sécurité garantie:** haute résistance à la glissance, idéale pour les zones humides et les espaces à fort trafic.
- **Haute résistance aux taches:** conserve son aspect comme au premier jour. Facile à nettoyer, garantissant une hygiène optimale et un entretien réduit.
- **Durabilité maximale:** grande résistance aux rayures et excellente résistance à l'abrasion pour un usage intensif sans usure.

NOMENCLATURE according to UNE EN 12004

Adhesives C: Cementitious adhesive, a mixture of hydraulic binders, mineral fillers and organic additives that only needs to be mixed with water or liquid addition just before use.

Adhesives D: Dispersion adhesive, a ready-to-use blend of organic binders in the form of a polymer in aqueous dispersion, organic additives and mineral fillers.

Adhesives R: Reactive resin adhesive, a mixture of synthetic resins, organic additives and mineral fillers whose curing results from a chemical reaction.

For each type of adhesive there may be different classes:

Class 1: Normal adhesive

Class 2: Improved Adhesive

Class F: Fast setting adhesive

Class T: Adhesive with reduced slip

Class E: Adhesive with extended open time (only for types C and D)

Class S1: Deformable adhesive (only for type C)

Class S2: Highly deformable adhesive (only for type C)

LAYING STANDARDS according to UNE EN 138002

The **UNE EN 138002** standard establishes the general rules for the installation of adhered ceramic tiles.

This standard indicates how these tiles should be installed to guarantee their quality, durability, technical and aesthetic features.

Piezas especiles cerámicas

Special tile pieces
Pièces spéciales de carrelage

Las baldosas cerámicas de Cristacer amplían su propuesta con las llamadas piezas especiales, diseñadas para adaptarse y personalizar diversos espacios de tu hogar. Estas piezas no solo cumplen una función decorativa, sino que también son prácticas, convirtiéndose en un elemento clave al planificar tus proyectos.

Cristacer's ceramic tiles extend their offer with the so-called special pieces, designed to adapt and personalise different spaces in your home. These pieces not only fulfil a decorative function, but are also practical, becoming a key element when planning your projects.

Les carreaux de céramique de Cristacer élargissent leur offre avec les pièces spéciales, conçues pour adapter et personnaliser les différents espaces de votre maison. Ces pièces ne remplissent pas seulement une fonction décorative, mais sont également pratiques, devenant un élément clé lors de la planification de vos projets.

FINISHED PRODUCTS STANDARDS

According to the ISO - 13006 specifications standard, our products belong to the following groups:

- PORCELAIN TILES - BIa Group: Dry pressed tiles, with a rate of water absorption, $E < = 0,5\%$
- FLOOR TILES - BIla Group: Dry pressed tiles, with a rate of water absorption, $3 < E < = 6\%$
- WALL TILES - BIII Group: Dry pressed tiles, with a rate of water absorption, $E > 10\%$

TEST STANDARDS

ISO 10545 - 2 Determination of dimensions

Sets for the methods for determining dimensional characteristics (length, width, thickness, straightness of sides, rectangularity and surface planarity).

ISO 10545 - 3 Determination of water absorption

Water absorption is a measure of the greater or lesser rate of porosity of the tile body. The test determines the amount absorbed by pieces after being submerged in boiling water for two hours. The rate of water absorption is expressed as a % with respect to the dry mass of pieces.

ISO 10545 Determination of bending strength

A tile's bending strength is determined by applying a force on the middle of the top side of the piece. The force applied is increased until the tile breaks. Bending strength is expressed in N / mm².

ISO 10545 - 7 Determination of the surface abrasion resistance of glazed tiles

The resistance of the glazed layer of tiles to abrasion is determined by applying a rotating abrasive load on the tile surface and visually inspecting pieces that have undergone testing against those that have not. Classification ranges from PEI 1 to 5.

In order to determine the suitability of ceramic floor tiles, their wear resistance must be known. This is influenced by not only the characteristics of tiles, but also by the place where they will be installed. The presence of abrasive materials (sand, gravel, etc.) and locations in areas with direct outdoor access are factors which shorten the lifespan of floor tiles.

Our floor tiles have been classified into five groups, which determine their resistance to abrasion and wear:

- PEI 1: Floor tiles exposed to light traffic, on which soft-soled footwear is used, free from abrasive products. Recommended in bedrooms and bathrooms in private homes, with no direct outside entry.
- PEI 2: Floor tiles exposed to average to light traffic, on which soft-soled footwear is used. Recommended for all rooms in single family homes except kitchens, entranceways, stairways and terraces.
- PEI 3: Floor tiles exposed to average to traffic, on which normal footwear is used. Recommended for all rooms in private homes and hotels, except for common areas such as stairways, entrances, etc.
- PEI 4: Floor tiles exposed to average to heavy traffic. Recommended for all types of single-family homes and multiunit dwellings, terraces, kitchens, business premises and offices. Not belonging to this group are all public places exposed to intense traffic such as tobacconists', new stands, bakeries, bar areas, public transport.
- PEI 5: Floor tiles adapted to highly intense traffic. Recommended in shopping centres, train/bus stations, airports, etc.

EN - 101 Surface hardness

Surface hardness determines the capacity of resistance of glazed surface to scratching. Tiles are classified on a scale of 1 to 10 based on the increasing hardness of the minerals used to scratch their surface. The MOHS hardness scale is as follows:

1 Talc | 2 Gypsum | 3 Calcite | 4 Fluorite | 5 Apatite | 6 Feldspar | 7 Quartz | 8 Topaz | 9 Corundum | 10 Diamond

ISO 10545 - 11 Determination of crazing resistance

Determination of the resistance to the formation of fissures in the glazed layer by subjecting whole tiles to steam at a pressure of 5kg / cm² in an autoclave after which a dye is applied to the glazed layer and tiles are examined to detect possible fissures.

ISO 10545 - 12 Determination of frost resistance

This establishes a method whereby whole tiles are soaked in water and then undergo 100 freezing-thaw cycles, between 5° C and -5° C.

DIN - 51130 Determination of the critical slippage angle

Angle / Group $3^\circ < a < 10^\circ$ / R9 - $10^\circ < a < 19^\circ$ / R10 - $19^\circ < a < 27^\circ$ / R11 - $27^\circ < a < 35^\circ$ / R12 - $35^\circ < a$ / R13

ISO 10545 - 8 Determination of linear thermal expansion

Determination of the linear thermal expansion coefficient for the interval between the ambient temperature and 100° C.

ISO 10545 - 13 Determination of the chemical resistance

This test determines the chemical resistance of tiles to cleaning agents, swimming pool additives, acid and alkalis, except for the hydrofluoric acid (HF) and its compounds.

The visual classification for cleaning agents and swimming pool additives is as follows:

- GA - When there is no visible effect (a slight change in colour is not considered as a chemical attack).
- GB - When appearance is modified.
- GC - When there is a partial or complete alteration of the original surface.

The visual classification for acids and alkalis goes from GLA, GLB to GLC, depending on the degree of chemical resistance.
